Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-5 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ash et al (US Patent 6,778,535).

As to claim 1, Ash et al teaches a method comprising: routing a set-up message to a plurality of nodes in a transport network, wherein said set-up message reserves network resources for a plurality of traffic paths through said transport network as said set-up message visits each of said plurality of nodes; (Abstract; col 2, lines 5-12; col 3, lines 3-45; col 5, lines 35-53)

and routing said set-up message to said plurality of nodes in said transport network, wherein said set-up message provisions network resources for said plurality of traffic paths through said transport network as said set-up message revisits each of said plurality of nodes. (Abstract; col 2, lines 5-12; col 3, lines 3-45; col 5, lines 35-53)

Application/Control Number: 10/053,781

Art Unit: 2155

As to claim 3, Ash et al teaches the method of claim 1 wherein said set-up message revisits each of said plurality of nodes in the reverse order in which said set-up message visits each of said plurality of nodes. (Abstract; Fig 2, col 3, lines 15-33)

As to claim 4, Ash et al teaches the method of claim 1 wherein said transport network is a mesh network. (Fig 3, col 3, lines 33-46)

As to claim 5, Ash et al teaches the method of claim 1 wherein said transport network is a ring network. (Fig 2, col 3, lines 3-32)

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ash et al (US Patent 6,778,535) further in view of Official Notice.

As to claim 2, Ash et al teaches the method of claim 1 however does not explicitly indicate at least one of said plurality of traffic paths is a working path in a SONET network.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use a path in a Synchronous Optical Network to make the system more efficient and versatile. SONET is a high speed network that provides a standard

Application/Control Number: 10/053,781 Page 4

Art Unit: 2155

interface for communications carriers based on fibre optic cables. Furthermore, SONET has the capability to transfer a plurality of data types over speeds of up to 2.488 Gbps.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asad M Nawaz whose telephone number is (571) 272-3988. The examiner can normally be reached on M-F 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain Alam can be reached on (571) 272-3978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
